Virginia Beach Convention Center Designed by Skidmore, Owings & Merrill

World-class architects, SOM, also built the Sears Tower

(Virginia Beach, Va., 2009) – The grandeur of the \$202.5 million Virginia Beach Convention Center was designed by the Chicago-based architecture firm of Skidmore, Owings & Merrill LLP (SOM). As one of the world’s largest architectural and engineering firms, SOM has designed structural greats such as the Sears Tower and John Hancock Center in Chicago, Bank of America building in San Francisco, Dallas Convention Center expansion, Hong Kong Convention and Exhibition Centre and Korea World Trade Centre. The design and sheer size of the Virginia Beach Convention Center poises Virginia Beach to compete for the lucrative national and regional convention market.

The Convention Center features over 500,000 gross square feet of space, including a 150,000 square-foot column-free exhibit hall, a 31,000 square-foot ballroom, 28,000 square feet of meeting space and 2,230 free parking spaces. SOM has long been involved in convention center design and appreciates the contribution a major public building can make to the vitality of a city. Clark Nexsen worked with SOM as a local partner.

Already, SOM has received honors for their design of the Virginia Beach Convention Center. The ninth annual installment of the *BusinessWeek/Architectural Record* award competition includes the Virginia Beach Convention Center as a recipient of the 2007 Citation for Excellence Award. The award criteria set forth by the *BusinessWeek/Architectural Record* award competition states, “buildings that receive the award must embody design excellence that contributes to their owners’ business goals in a proficient and demonstrable manner.” In addition, in 2006, the Chicago chapter of the American Institute of Architects (AIA Chicago) awarded the architecture firm a Citation of Merit in the Distinguished Building Award category for the Convention Center’s design.
